Expanding Markets Through Frozen Produce

Explore a new market opportunity for locally-grown produce! The Center for Innovative Food Technology (CIFT) is excited to introduce a newly-developed process that will allow growers to freeze produce, yet retaining maximum freshness and taste.

As a grower, you may have:

- Excess product at the end of the season.
- An interest in expanding your crop selection.
- A desire to grow more product if an outlet was established.

Bon Appétit Management Company, a café and catering service organization with more than 400 locations in 29 states, is seeking **local**, frozen items to serve to their clients at various corporations, universities and specialty venues.

Please join us at the CIFT office to learn more!
Call 419-535-6000, ext. 112, for more information.

**Note: In the event of inclement weather,
call 419-535-6000, ext. 112, to confirm session status.**
